Hiring Manager

Oracle

Bengaluru, Karnataka / Hyderabad, Telangana, India

Dear Hiring Manager,

I am thrilled to apply for the Student/Intern position (Job ID: 262358) at Oracle. With a strong background in software development and a keen interest in cloud technologies, I am excited about the opportunity to contribute to Oracle's innovative solutions. My recent internship at Barclays Technology sharpened my skills in automation and workflow optimization, where I created a web application that automated IBM TWS sheets, reducing manual input by 90% and saving over 100 hours monthly.

I am currently pursuing a Bachelor's degree in Computer Engineering at Thapar Institute of Engineering and Technology, with a CGPA of 9.17. This academic journey, along with my practical experience, has equipped me with a deep understanding of programming languages like Python, C++, Java, and SQL. My hands-on experience in creating high-impact solutions, like an NLP-based chatbot for farmers and a Quora question pair classifier with 86% accuracy, reflects my dedication to leveraging technology for real-world solutions.

Oracle's commitment to fostering a collaborative and inclusive environment resonates with me. As a core member of ACM Thapar, I mentored over 50 students in DSA, helping them grow their technical skills and encouraging teamwork and innovation. I am confident that my technical background, combined with my passion for collaboration, makes me a strong fit for Oracle's team-oriented culture.

Thank you for considering my application. I am eager to discuss how my experience and skills align with Oracle's goals, and I look forward to contributing to the impactful projects at Oracle. Please feel free to contact me via email or phone to arrange a convenient time for further discussion.

Warm regards,

Pratham Agarwal
